

## Environmental policy

Kasthall is ISO14001 certified and we produce, import and marketing high quality and designed rugs and floors for private and public spaces. Environmental responsibility strongly influences our production methods and the company's future development. Environmental considerations should be linked with quality thinking. The organization should constant improve its environmental impact.

### **We shall:**

- continue our work to constantly improve our environmental work so that the effect on the environment is as little as possible.
- follow the relevant laws and other environmental requirements.
- keep employees, suppliers and customers informed about our environmental policy and efforts.

### **To achieve this the organization shall:**

- choose raw materials and packaging that consider the environment.
- carry our environmental assessments of investments and production methods before implementing them.
- give preference to suppliers who show considerations for the environment.
- minimize waste.
